<b>FEEDBACK FOR PRESENTER</b>	Could have been just a tiny bit louder, your presentation was well organized and did not shy away from providing more information despite the short amount of time. It was also a bold move to stand on the other side of the stage.	Very interesting topic, I learned something new. The slides were not as helpful in supporting the talk as I would have hoped - many of the images were not fully explained. The spoken presentation was excellent.	Brilliant job. Engaging presentation style; excellent script; powerful use of visuals. BRAVA.	Choosing the other side of the stage was a great move since the podium wasn't required. You started out with a good question for the audience. Slow your pace so that it seems more like you are sharing rather than delivering your memorized talk.	Great opening and excellent use of icons. A note about figures--often it can be helpful to edit figures made for papers to be more visually appealing (less scientific-looking) for presentations (but this didn't really affect the talk, as this was only one, briefly shown slide). Overall, the communication and structure of the talk was excellent, the research was compelling, and the visuals were very strong. And I learned something new!
